

# New to range CATs and DPFs

In this release:

## August 2014

**New to range CATs include premium replacements for VAG Group vehicles such as the Audi A6, VW Passat and Skoda Superb, for the Ford Transit, Vauxhall Vectra and Omega, plus, Jaguar XJ8 and various PSA, Honda and BMW models.**

**New DPFs include Mazda 6, which is a combined Cat and DPF unit, Jaguar S-Type and Honda's popular soft-roader the CR-V.**

**Based at the company's central manufacturing and stock warehouse location in Cheadle, the Klarius R&D department produces new replacement exhaust, CAT and DPF designs, including all necessary mountings daily.**

## Klarius quality, stock & availability:

Klarius exhausts, CATs and DPFs are manufactured, tested and fully test fitted to real-world vehicles at the manufacturing and R&D centre in Cheadle. Klarius is the only manufacturer to design and test all parts on actual vehicles of the correct model and year, which allows the company to offer its unique Klarius Fit First Time guarantee.

The latest product references are all in-stock, along with over 10,000 part references at the warehouse in Cheadle. They are live on the Klarius electronic catalogue and various sourcing platforms such as TecDoc right now.

For regular updates register on the Klarius website at [www.klarius.eu](http://www.klarius.eu)

### Doug says:

"If you combine our very fast, reactive manufacturing response with the general product ageing trends we end up producing an assortment of 'new' replacement items for a huge range of vehicles of different ages. On the latest list you'll see everything from a Vauxhall Omega to a very recent Honda Civic, through to oddballs like the Subaru Justy. Look out for a new list of exhausts next month."

Doug Bentley,  
Klarius Head of R&D.
